Subject: RE: CAD Meeting?

I think the way you present the modeling data in context is excellent and generally what needs to be done with such types of analyses. One of the items I recommended for the report was to provide some context, which we did based on the total amount sequestered, but I am glad to see you have taken it the next step. I can double check your math if it would help, but in general the relative comparison doesn't surprise me.

Tom

Tom - great to hear you to can help with this. What might work is to start with a general discussion of CADs, including a quick summary of their use around New England, and then into a summary of the modeling estimates (as you say in a format consumable for a lay audience). Most of our stakeholdes support the concept, but we can expect a couple of the local activists to make some noise. One in particular always brings up air issues (we have a separate modeling report on that). But we can discuss more as we get closer.

Attached are some of the draft posters. Battelle is working up some others on their plume tracking effort. But check out the last poster attached and let me know if you have any concerns about the way I've summarized the modeling.

Thanks! Dave

Subject: RE: CAD Meeting?

Dave,

I could definitely provide a presentation for the meeting. Would you be looking for a summary of the report, but in a bit more consumable format, or a more general CAD cell presentation?

I hope your elder-care matters settle down a bit. It is hard juggling those responsibilities with other aspects of life, but the elder-care is something we need to give priority to. The reality is that it is easy to project ourselves into the situation of our parents, so we need to use that perspective in positive ways.

Tom

Tom - thanks for checking in. I've been meaning to talk to you about this but had a rough week elder-care wise. We plan to use our next monthly community outreach meeting on Jan 28th to focus on the upcoming lower harbor CAD cell proposal. We'll have a poster session to start the meeting and we'd like to have a guest speaker. Would you be interested? Or someone else from the modeling team? We won't have a lot of time for the presentation, probably around 20-25 minutes or so, plus Q&A. It'll be in New Bedford at the public library at 7pm. Let me know what you think. Thanks - Dave

CAD Meeting?

Dave,

Mark Otis mentioned you were thinking about having a meeting on CADs sometime in January and that you might want me to be involved. True? If so, when, etc.?

Tom
